YOUR BEST CHOICE

LSB Max

Pack length 3200m

Offering more meters per spool than any other big baler twine, LSB Max is designed for lower density bales such as hay for livestock.

LOW

LSB Long

Pack length 3000m

A cost-efficient solution that is suitable for use in all crops and in normal baling conditions. LSB Long is similar to Type 150 twine.

STANDARD

LSB Power

Pack length 2800m

Designed for all baler densities, LSB Power offers the same resistance and performance as Type 130 twine.

LSB Power XL

Spool length 1650m

Extra length single spool version

HIGH

HD Extra

Pack length 2600m

A high-density solution designed for difficult crops, such as barley straw, under harsh conditions. HD Extra is a cost-efficient twine with the same performance as Type 110 twine.

HD Extra XL

Spool length 1450m

Extra length single spool version

VERY HIGH

HD Prime

Pack length 2200m

Tama's strongest twine, the HD Prime ensures reliable and consistent performance under the most challenging conditions.

HD Prime XL

Spool length 1350m

Extra length single spool version

EXTREME
