

NDicatorTM

With the built-in visual elongation pointer

Stretching the limits!

Let your net do the thinking...

NDicator™

With the built-in visual elongation pointer

No need to measure, no need to calculate

- The **NDicator™** has been specially invented and developed to make your life easier.
- The **NDicator™** shows you when the **X-SPAN®** net is stretched to optimum capacity for more wrapped pallets per roll, whilst full activation of the memory for superior holding power.
- After the pallet is wrapped, monitoring performance is easy: you look for the flat blue lines – a visual indication that the net is properly stretched and you count the **NDicator™** blue lines to verify the number of wraps applied.
- No more guessing, no need for complicated measuring and calculating. With the **NDicator™** you **know** you are getting it right over and over again!
- A bonus - We placed the **NDicator™** blue line off center so you know in which direction to mount the roll, every single time.

Now, with the all new **NDicator™** you know you are enjoying all the benefits of the **X-SPAN®** technology:

- Higher elongation for more pallets wrapped per roll = lower cost
- Optimum elongation for memory activation = superior holding
- Width keeping for wider wrap = less wraps = lower cost and faster wrapping
- Over the top wrapping = "Third dimension of stability"

Let your net do the thinking...
