

CROP PACKAGING PRODUCTS

I BALE IT MY WAY

You bale it your way – and we ensure you can, with Case IH Crop Packaging bringing the highest performance baling and wrapping products together in one complete range.

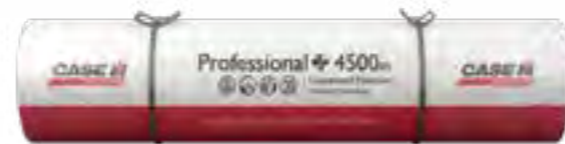

Case IH Netwrap and Baler Twines are made by Tama Plastic Industry, who have a long experience in baling... and are also experts in high specification manufacturing of netwrap and twine, so baling your own way has never been easier.

Case IH Professional

The “PLUS” generation

Case IH brings you the best bales, at a lower cost of production, by increasing performance and providing a reliable, consistent baling product.

- By understanding you and how you bale, we developed a netwrap that improves the efficiency of your baler, using the latest advances in raw materials and production technology.
- The light-weight netwrap made with unique Bale+ technology, has more running length on the roll than ‘standard’ 3000m white net and still with a workable roll weight. Case IH Professional+ keeps running when others need to change.
- The Tama Bale+ Technology makes a longer net length possible, so reduces fetching and carrying of extra rolls, making the most of the storage space in the baler and increasing its working potential. The lighter net technology also reduces the total amount of netwrap plastic used from the same bale count as well as reducing waste packaging.
- The new Professional+ range brings enhanced performance in a full range of lengths. Choose the length that suits your operation.

All Case IH Professional+ netwrap offers you many operating benefits to make your baling task easier and more efficient:

- **ZEBRA® SYSTEM** - Case IH Professional+ features the unique ZEBRA System roll pattern. The asymmetrical striping pattern, gives the operator a very clear ‘left-right’ indicator when loading the net roll. And makes it easy to identify bale un-roll direction.
- **EDGE TO EDGE™ TECHNOLOGY** - Case IH Professional+ is manufactured using Tama’s unique ‘Edge to Edge’ technology, which guarantees full bale coverage, from all round balers and so produces the perfect bale, every time.
- **ROLL END WARNING** - Every roll of Case IH Professional+ has a visible Roll End warning stripe, which shows the end of the roll is approaching, allowing the operator to prepare for a roll change and avoid baling without net in the baler, thus further reducing valuable ‘down time’.
- **CARRY HANDLES** - Every roll of Case IH Professional+ is fitted with purpose carrying handles, to assist the operator in handling and carrying the roll.

PRODUCT SPECIFICATIONS

CASE IH NETWRAP

Product name	Professional+	Professional+	Professional+
Roll length	2,800 m	3,600 m	4,500 m
Roll width	123 cm	123 cm	123 cm
Colour	Black-white	Black-white	Black-white
Featured technologies	Bale+	Bale+	Bale+
Rolls per pallet	36	28	28
Pallet dimensions	96 x 125 cm	112 x 125 cm	112 x 125 cm
Pallet height	± 2.21 m	± 2.09 m	± 2.09 m

Zebra stripes pattern, and Bale+ Technology logo are trade marks of Tama Plastic Industry.

Case IH Maxxima

Baling your way, we know that you need consistency, ease of operation and trouble-free baling.

Case IH twines for big balers combine the usual high performance of standard Type 130 and Type 110 twines with a considerable increase in pack length. These Big Bale twines can help you to save money, save time and work more efficiently.

Developed in conjunction with the manufacturers of the baler knotting systems, Case IH Maxxima Series is a softer, easier knotting twine to guarantee higher knot performance for more secure bales and easier tying between spools.

The products are suitable for use on ALL makes and models of large square balers, and the spool dimensions are able to fit in ALL twine boxes on every make of large square baler.

FARMERS' FEEDBACK

Les Bailey, Sales Manager at Case IH dealer Johnsons of Cheadle in the UK.

Les took the decision to stock and supply Case IH Professional netwrap 3 years ago, further promoting the Case IH brand within his business. Les recognised that Tama Edge to Edge would provide his customers with quality and therefore Case IH Professional netwrap was naturally an easy decision. Les says Tama's knowledge of crop packaging and excellent after-sales support have been invaluable to him in promoting crop packaging within his business.

Ken Carr is a contractor baling up to 16,000 bales per year in Staffordshire, UK.

Ken fully appreciates that downtime can create one of the biggest costs to his business. Ken says, "I have baled for over 25 years and Case Professional netwrap provides quality and consistency." Ken appreciates the excellent coverage and smooth feeding of the Tama manufactured Edge to Edge netwrap, ensuring his balers are always running.
