

UNLEASH YOUR BALING POTENTIAL

CROP BALING PRODUCTS

CASE IH

SUSTAINABILITY IN EVERY ROLL

UNLEASH YOUR BALING POTENTIAL

EXCEEDING EXPECTATIONS

We believe in exceeding expectations, our Crop Baling Products deliver cutting-edge performance with less effect on the environment. Clever design and manufacturing mean there is less plastic used per bale and less waste overall during the whole product life cycle.

Choosing a CASE IH baler is the first step in unleashing your baling potential, using the best Crop Baling Products comes next. CASE IH have worked closely with crop baling specialists Tama to produce an advanced range of Netwrap and Baler Twine designed to meet the demands of modern balers.

EXCELLENT FIELD PERFORMANCE

- All products have guaranteed minimum length rolls
- Simple changeovers thanks to user-friendly design
- Strong knotting and binding keeping bales secure during transport and storage
- Consistent quality equals smooth operation during baling

Rolls packaged in sustainable plastic from recycled material

Zero waste during production of all Crop Baling Products

Netwrap containing recycled material is now available (with limited availability)

Guaranteed plastic reduction per bale compared to standard Twine and Netwrap

Longer rolls, fewer changeovers, less packaging

CASE IH PROFESSIONAL

The “PLUS” Generation

CASE IH Professional Netwrap maximizes baler performance. Packed with features to improve productivity, it is the first choice for professional baling.

- 1 **HAVE THE CHOICE TO BALE FOR LONGER.** Bale+ technology creates a stronger yet lighter Netwrap which offers longer roll lengths at workable weights, so you can bale with less downtime for changeovers.
- 2 **LIGHTER WRAP EQUALS LESS PLASTIC USED PER BALE COMPARED TO STANDARD WRAP.** Our analysis show 20% less plastic per bale when applying the same amount or wraps. There is also less packaging waste thanks to our longer length netwrap.
- 3 **CROPS ARE TRULY SECURE WITH EDGE TO EDGE™ COVERAGE PREVENTING LOSSES AND BREAKAGE.**
- 4 **UNIQUE ZEBRA™ SYSTEM ROLL PATTERN** gives clear left-right indicator for roll loading and helps later on by showing the unroll direction when the bale is used.

- 5 **ROLL END WARNING STRIPE** allows the operator to prepare for changeovers and avoid baling without net in the machine.
- 6 **EVERY ROLL OF CASE IH PROFESSIONAL+** is fitted with carrying handles to assist the operator in handling and carrying the roll.

CASE IH BALER TWINE

The best choice for your large square baler

Picking the right baler twine for the job is important. Different tasks require different strengths for the most efficient and cost-effective results. CASE IH offer four different twine strengths to suit various situations.

- Exceptional knot strength and reliability giving stronger bales for transport and storage.
- Longer spools with no loss of performance, allowing you to bale for longer without stopping
- Up to 25% less plastic per bale, saving as much as 570 kg of plastic and 57 shrink packages per 10,000 bales

CASE IH Maxxima Long

STANDARD

CASE IH Maxxima Max

LOW

Developed in conjunction with the manufacturers of the baler knotting systems, the Case IH Maxxima Series is a softer, easier knotting twine to guarantee higher knot performance for more secure bales and easier tying between spools.

The full range is compatible with all makes and models of large square balers.

For the recommended twine please contact your dealer

* Recommended twine is NH Supreme HD. Available also in big spool

** These balers are fitted with CIH Twine pro knotting system

CLOSING THE BALING LOOP IS A JOINT EFFORT

In partnership with Tama, we are taking steps to close the loop. In the same way, farmers recycle nutrients and organic matter through the soil to grow crops year after year. We can now do the same with crop baling products.

Shake

After opening the bale we need your help with shaking out any residual crop from the net and twine, and keeping the used plastic for collection, instead of throwing it away.

Collect

National collection Schemes and collecting companies take used crop baling products and transport them to recycling facilities.

Recycle

Materials are cleaned, graded and palletized in preparation for reuse.

Reuse

Recycled materials are used to manufacture new products including CASE IH Crop Baling Products, which contains 30% recycled material (limited availability).
